

FOOD DELIVERY MARKET INTELLIGENCE PROJECT

NETWORK INVESTIGATION REPORT

COLLEGE ROAD, NASHIK

SUBMITTED BY – KAYA

DATE- 03 JUNE,2026

PLATFROM – ZOMATO.COM

Part 2: Network Investigation Documentation

Tool Used: Google Chrome Developer Tools (F12)

Platform Investigated: Zomato.com

API 1 - Restaurant Listing API

URL: zomato.com/nashik/delivery-in-college-road

Method: GET

Response Type: JSON

Information Returned: List of restaurants with names, ratings, cuisines, delivery time

API 2 - Restaurant Details API

URL: getPage?page_url=/nashik/olio-the-wood-fired-pizzeria

Method: GET

Response Type: JSON

Information Returned: resId, name, pageTitle, cuisines, cost for two, address

API 3 - Auto Suggest API

URL: autoSuggest?addressId=0

Method: GET

Response Type: JSON

Information Returned: Search suggestions for restaurants

Findings:

Zomato uses multiple JSON APIs to load restaurant data dynamically without refreshing the page.

Each API returns structured JSON data including restaurant ID, name, cuisine type, cost for two, and location details.

Screenshots of all API responses are included in the Screenshots folder as evidence.

API 3 - Auto Suggest API

URL: autoSuggest?addressId=0

Method: GET

Response Type: JSON

Information Returned: Search suggestions for restaurants

Findings:
